

CHEMICAL ENGINEER

Process Engineering Department

POSITION: Chemical Engineer

JOB DESCRIPTION

We are looking for a Chemical Engineer to design and optimize chemical processes in our manufacturing facility.

KEY RESPONSIBILITIES

- Design and optimize chemical processes and equipment
- Conduct process simulations and calculations
- Ensure safety and environmental compliance
- Troubleshoot process issues and implement improvements
- Collaborate with operations and maintenance teams

QUALIFICATIONS

- Bachelor's degree in Chemical Engineering
- 3+ years of process engineering experience
- Experience with process simulation software
- Knowledge of chemical process safety

REQUIRED SKILLS

- Process design and optimization
- Chemical engineering principles
- Safety and environmental compliance
- Problem-solving and analytical skills

COMPENSATION

- Competitive engineering salary
- Performance bonuses
