

## **ELECTRICAL ENGINEER**

Engineering Department

POSITION: Electrical Engineer

### **JOB DESCRIPTION**

We are looking for an Electrical Engineer to design and develop electrical systems for our products. The ideal candidate will have experience in circuit design and power systems.

### **KEY RESPONSIBILITIES**

- Design electrical circuits and systems
- Develop PCB layouts and schematics
- Conduct testing and validation of electrical components
- Collaborate with mechanical and software engineers
- Ensure compliance with electrical standards and regulations

### **QUALIFICATIONS**

- Bachelor's degree in Electrical Engineering
- 3+ years of electrical design experience
- Experience with PCB design software
- Knowledge of power systems and electronics

### **REQUIRED SKILLS**

- Circuit design and analysis
- PCB layout and schematic capture
- Electrical testing and measurement
- Problem-solving and analytical skills

### **COMPENSATION**

- Competitive engineering salary
